* The standard sizes listed above are manufactured as one unit with a continuous head and sill.

Standard Size Door Ordering Instructions:

1. Doors come standard in new construction configuration with a J-channel and nailing fin around the complete unit. The J-channel and nailing fin can be removed at the factory at no extra charge. Please specify on your order if you'd like us to remove the J-channel, nailing fin, or both. In all configurations, the nailing fin will be left on the bottom of the door to protect the threshold from shipping damage.
2. Doors come standard as **XO** viewed from the exterior with X being the operating panel. Reverse would be **OX** and must be specified on the order. Single point lock doors can also be ordered **Reversible** so the handing can be changed on the job site. Refer to the Slider Information Page 1-6 in the first section of this catalogue for more detailed instructions. Always specify XO, OX, or Reversible when ordering 2-Panel doors.
3. 3-Panel doors come standard as **O-XO** viewed from the exterior with X being the operating panel sliding to the right. Always specify XOO, OXO, OOX, or Reversible when ordering 3-Panel doors.
